

ABSTRACT

A nonwoven-fabric-type oil filter, integral to a valve body, includes a first cover member mounted to an open side of the valve body and has a first cover, a second cover and a nonwoven fabric oil filter therebetween. The first cover member has at least one first oil hole for allowing oil flow therethrough. The second cover member is
5 conjoined with the first cover member and has at least one second oil hole. The nonwoven fabric oil filter is disposed between the first and second cover members for filtering oil flowing from the valve body into a hollow portion therebetween.
